NOTICE OF TERMINATION (NOT) OF GENERIC PERMIT COVERAGE

Who May File an NOT:

Permittees who are presently covered under the Generic Permit for Stormwater Discharge From Construction Activities that Disturb Five or More Acres of Land provided in Rule 62-621.300(4), F.A.C., the Multi-Sector Generic Permit for Stormwater Discharge Associated with Industrial Activity provided in Rule 62-621.300(5), F.A.C., or an EPA-issued National Pollutant Discharge Elimination System (NPDES) general permit for stormwater discharges associated with industrial activity may submit a Notice of Termination (NOT) when their facility or activity no longer has any stormwater discharges associated with industrial activity as defined at 40 CFR 122.26(b)(14), or when they are no longer the operator of the facility or activity.

For construction activities, elimination of all stormwater discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all stormwater discharges associated with industrial activity from the construction site that are authorized under the generic permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.
