

E. Permitting and Approved Information

1) Indicate if a comprehensive plan amendment will be required for this development.

Some portions of the site are designated Rural Commercial and Residential-B, similar to that which would facilitate the proposed development. The majority of the site is designated Agriculture and Rural/Silviculture/Miscellaneous. A comprehensive plan amendment to the County's Future Land Use Map (FLUM) will be necessary to accommodate the mixture of uses in the master plan and to allow for pipelining of transportation improvements.

2) Provide a list of all permits already applied for or received, specifying the date of application, issuing agency, and function of the permit.

No permits have been applied for nor received on the subject property to date.
