

Monthly Economic Indicators Report
April 2023

MESSAGE FROM THE DIRECTOR

The St. Johns County Department of Economic Development is pleased to present this economic indicator report for April 2023, which is updated to include the most recent data available from various sources. This publication is made possible by data researched and tabulated under the auspices the St. Johns County Board of County Commissioners, the St. Johns County Administrator, and the St. Johns County Department of Economic Development. We are all grateful to all those who contributed to the successful compilation of this report and welcome any suggestions or comments that may improve our publication. It is our hope that this report will provide you with information that proves valuable to you and our community at large, and always reach out to us if there's more we can do. Please send your thoughts to myself or David Kiernan at dkiernan@sjcfl.us.

Joy Andrews
Deputy County Administrator - Director of Economic Development
St. Johns County

1. Introduction

This St. Johns County (SJC) monthly economic indicators report was prepared to provide the public with information about current economic conditions and economic trends in SJC. The report includes information on the following topics:

- Section 2 - SJC Employment and Wages
- Section 3 - Regional Consumer Prices
- Section 4 - SJC Building Permits
- Section 5 - SJC Housing Market Statistics
- Section 6 – SJC Visitor Accommodations Statistics

In general, recent data are presented in tables while longer-term data are presented in chart format in order to illustrate trends. Below are more detailed descriptions of the data utilized and specific indicators that are presented, along with appropriate citations. References can be found in Section 7.

SJC Employment and Wages (Section 2)

Information in this section comes from publications by the United States (U.S.) Bureau of Labor Statistics (BLS). Monthly data on number of persons employed, number of persons unemployed, and the unemployment rate are produced by the BLS Local Area Unemployment Statistics program (U.S. BLS 2023a). Quarterly data on wages are produced by the BLS Quarterly Census of Employment and Wages program (U.S. BLS 2023b).

- **Number employed:** represents the number of persons who are employed rather than the total number of jobs. The number of employed persons in SJC has generally trended up over the years as population and economic activity have expanded. The number employed in February 2023 was the highest in SJC history.
- **Number unemployed:** includes persons 16 years of age and older who are available and looking for work but are unable to find jobs. This measure has also trended up over the years in association with population growth in SJC.
- **Unemployment rate:** equals the number of unemployed divided by the sum of employed and unemployed persons. The unemployment rate in SJC, as of February 2023, was near historic lows, at a level that could be considered full employment whereby normal employment transitions (i.e., rather than economically driven layoffs) constitute the bulk of those who are unemployed.
- **Covered wages:** In 2019, SJC joined the group of the nation’s largest 356 counties and is therefore now included in the BLS measure of quarterly wages. Covered wages indicates that the wages being measured are those earned by workers covered by the Social Security system.

Regional Consumer Prices (Section 3)

Information in this section comes from two sources, the U.S. BLS and GasBuddy LLC. Monthly Consumer Price Index (CPI) data for the South Atlantic census division are produced by the BLS CPI program (U.S. BLS 2023c); SJC is included in this census division and these data are considered the best available to represent monthly consumer price changes in SJC. Data on gas prices, presented over a monthly and 6-month timeframe, are produced by GasBuddy LLC (2023); data are presented for the U.S. average, Florida overall, and Jacksonville with Jacksonville prices considered most representative of SJC.

- **South Atlantic CPI:** measures consumer price changes for ‘all urban consumers’ in eight states, including Florida, as well as the District of Columbia. This measure has generally been increasing since its inception in December 2017, reached an all-time high in March 2023.
- **Gasoline prices:** these are influenced by numerous supply and demand factors, state and local gas tax rates, as well as fuel transportation costs. Florida and Jacksonville prices tend to be below the national average.

SJC Building Permits (Section 4)

Information in this section comes from the SJC Department of Building Services (SJC 2023) and are updated monthly. Data that are presented in this section include single family housing permits, commercial building permits, and total building permits. For each of these types of permits, tables are provided showing data for the most recent month along with the prior 12 months. In addition to the number of permits issued, information on the percentage change from the previous month and previous year are provided, as well as the 6-month moving average in permits. The 6-month moving average is the average of the current month and the previous five months and is useful for presenting smoothed trends when individual monthly data points may have a high degree of variability.

- **Single family housing permits:** includes attached and detached residential structures. The smoothed trend (utilizing a 6-month moving average) in this measure shows declines from mid-2018 to mid-2020, a substantial increase from mid-2020 to mid-2021, and recent declines.
- **Commercial permits:** includes structures utilized for purposes of conducting business. The smoothed trend (utilizing a 6-month moving average) in this measure shows declines from mid-2018 to mid-2020, a substantial increase from mid-2020 to mid-2021, and recent declines that appear to be stabilizing.
- **Total permits:** includes residential, commercial, and miscellaneous (additions, swimming pools etc.). The smoothed trend (utilizing a 6-month moving average) in this measure shows declines from mid-2018 to mid-2020, a substantial increase from mid-2020 to mid-2021, and recent declines.

SJC Housing Market Statistics (Section 5)

Information in this section comes from the North Florida Association of Realtors (NEFAR 2023) and includes monthly data for SJC overall and eight subsections of the county, for all types of residences. Data presented include median sales prices, months of inventory on the market, and the home affordability index. In addition to information from NEFAR, this section presents data on ‘Market hotness’ that are produced by Realtor.com and were gathered from the Federal Reserve Bank of St. Louis (FRED 2023a; FRED 2023b). These hotness measures attempt to gauge the strength of the real estate market either relative to the previous year (i.e., listing views per property), or on a trend basis (i.e., median days on the market).

- **Median sales price:** represents the middle price that was paid for a residential housing unit during a period of time. The smoothed trend (utilizing a 6-month moving average) in this measure, for SJC overall, shows accelerated price increases from mid-2020 through mid-2022; however, there have been recent declines.
- **Months of inventory:** the number of months that all current listings can expect to be sold within. The smoothed trend (utilizing a 6-month moving average) in this measure, for SJC overall, shows a steep deceleration beginning in early-2020 and more recent increases beginning in mid-2021.
- **Affordability index:** takes into account median family incomes, median home prices, and mortgage rates to gauge to what extent a family that earns exactly the median income for their area can afford a home in their area – an index level of 100 indicates that the median family income in an area (along with a 20% down payment) is exactly enough income to qualify for a mortgage on a median priced home in the area – as index values increase, homes are considered more affordable and vice versa. This measure, for SJC overall, shows a steep deceleration beginning in early-2021; however, that trend has stabilized.
- **Market hotness - median days on the market:** an indicator of how long it takes for a listed property to sell. This measure began a steep decline in early 2020 but has recently returned to 2017-2018 levels.
- **Market hotness - % change from prior year in listing views per property:** a measure of home buyer interest relative to the previous year. This measure spiked in March of 2021, with approximately 5.5 times as many listing views as there were in March of 2020. Relative to early 2022, early 2023 listing views are down substantially.

SJC Visitor Accommodations Statistics (Section 6)

Information presented in this section was developed based on information from Smith Travel Research (STR 2023) as well as Local Option Tourist Development Tax Reports (SJC TDC 2023), which are prepared by the SJC Tax Collectors Office and published in concert with regular SJC Tourist Development Council (TDC) meetings. Data from Local Option Tourist Development Tax Reports includes total Tourist Development Tax (TDT) remitted, TDT remitted by location within SJC, and TDT remitted in SJC by type of accommodation. Data based on information from Smith Travel Research includes total lodging establishment revenues in SJC, average daily room rates, and occupancy rates.

- **Total TDT remitted:** represents a portion of the SJC bed tax. Information is presented on a monthly basis, in order to illustrate seasonality, which tends to indicate that March through July generate the most TDT, with September through November tending to generate the least TDT. While TDT revenues were generally trending upward from 2012 to 2020, that upward trend began to steepen in 2021 and an all-time high in TDT was achieved in March of 2022.
- **TDT remitted by location:** TDT revenue by where, within SJC, that revenue was generated. Data since 2012 indicates that Anastasia Island (primarily St. Augustine Beach) has historically generated more TDT than any other location in SJC, with St. Augustine/Vilano Beach (primarily downtown St. Augustine) generating the second most.
- **TDT remitted by type of accommodation:** breaks down TDT revenue by the type of accommodation that generated the revenue. Hotels and motels have historically generated the most TDT of all accommodation types. TDT revenue from apartment rentals has been growing more quickly than from any other type of accommodation.
- **Lodging establishment revenue:** represents total revenue earned by SJC lodging establishments (including hotels, motels, and bed and breakfasts). This measure tends to increase with higher occupancy rates, higher room rates, and the overall number of visitors to SJC. The smoothed trend (utilizing a 6-month moving average) in this measure shows declines from mid-2019 to late-2020, and substantial increases that have generally continued since then.
- **Average daily rate:** represents the average price for an overnight stay in an SJC lodging establishment. The smoothed trend (utilizing a 6-month moving average) in average daily rate has closely resembled total revenue and appears to be the driver of recent revenue gains, more so than increased visitation.
- **Occupancy rate:** on average, representative of the percentage of rooms that are occupied on a given night. With the exception of COVID-19 influenced months, the smoothed trend (utilizing a 6-month moving average) in this measure has been stable at between 60% and 70% occupancy depending on seasonal factors.

2. SJC Employment and Wages

Number Employed

Table 1 shows that the number of employed persons in SJC, as of February 2023, was 150,567. This number represents a change of 1.2% from the previous month and 5.9% from the same month of the previous year. Figure 1 shows the long-term trend in the number of persons employed in SJC from the start of 2007 to the most recent month.

Table 1. Number Employed and Rates of Change, SJC, February 2022 – February 2023

	Feb-22	Mar-22	Apr-22	May-22	Jun-22	Jul-22	Aug-22	Sep-22	Oct-22	Nov-22	Dec-22	Jan-23	Feb-23

Figure 1. Number Employed in SJC, Monthly, January 2007 – February 2023

Number Unemployed

Table 2 shows that the number of unemployed persons in SJC, as of February 2023, was 3,448. This number represents a change of 1.0% from the previous month and 4.4% from the same month of the previous year. Figure 2 shows the long-term trend in the number of unemployed in SJC from the start of 2007 to the most recent month.

Table 2. Number Unemployed and Rates of Change, SJC, February 2022 – February 2023

Figure 2. Number Unemployed in SJC, Monthly, January 2007 – February 2023

Unemployment Rate

Table 3 shows that the unemployment rate in SJC, as of February 2023, was 2.2%. This rate represents a change of 0.0 percentage points from the previous month and -0.1 percentage points from the same month of the previous year. Figure 3 shows the long-term trend in the unemployment rate in SJC from the start of 2007 to the most recent month.

Table 3. Unemployment Rate and Percentage Point Changes, SJC, February 2022 – February 2023

	Feb-22	Mar-22	Apr-22	May-22	Jun-22	Jul-22	Aug-22	Sep-22	Oct-22	Nov-22	Dec-22	Jan-23	Feb-23

Figure 3. Unemployment Rate in SJC, Monthly, January 2007 – February 2023

Covered Wages

Table 4 shows average weekly wages for covered employees in SJC on a quarterly basis, those wages on an annualized basis, the % change in weekly wages from the previous quarter and same quarter of the prior years, as well as the national rank in % change from the previous year among the 356 counties that are included in the BLS survey. As of Q3 2022, the average weekly wage in SJC was \$1,080, which, on an annualized basis equals \$51,840 per year. These figures represented a change of 2.4% from the previous quarter and a 11.6% change from the same quarter of the prior year – ranking 19th highest among the 356 counties included in the BLS survey.

Table 4. Weekly Wages for Covered Employees in SJC, Quarterly, 2019 – 2022

Quarter	Average Weekly Wages	Estimated Annual Wages	% Change from Prior Quarter	% Change from Same Quarter of Prior Year	National Rank in % Change from Prior Year
Q1 2019	\$909	\$43,632		0.4%	315
Q2 2019	\$844	\$40,512	-7.2%	1.7%	327

Q3 2022	\$1,080	\$51,840	2.4%	11.6%	19

3. Regional Consumer Prices

South Atlantic Area Consumer Price Index

Table 5 shows the consumer price index for the South Atlantic Area from March 2022 to March 2023. Over that period, consumer prices increased by 5.6%, including a change of 0.5% compared to the previous month. Figure 4 illustrates the trend in consumer prices for the South Atlantic Area, which are up 24.5% since December of 2017 when data for the area was first published.

Table 5. Consumer Price Index (Dec. 2017 = 100), South Atlantic Area, March 2022 – March 2023

	Mar-22	Apr-22	May-22	Jun-22	Jul-22	Aug-22	Sep-22	Oct-22	Nov-22	Dec-22	Jan-23	Feb-23	Mar-23
Consumer Price Index	117.9	118.3	119.6	121.3	121.6	121.4	121.8	122.4	122.8	122.4	123.2	123.9	124.5

% Change Prior Year	9.2%	8.8%	9.2%	9.8%	9.5%	9.0%	8.8%	8.3%	8.1%	7.3%	6.9%	6.4%	5.6%

Figure 4. Consumer Price Index, South Atlantic Area (Dec. 2017 = 100), Monthly, 2017–2023

Gasoline Prices

Figure 5 and Figure 6 illustrate daily gasoline prices for the U.S. overall, the State of Florida overall, and for Jacksonville over the previous month and previous six months, respectively. Over the past six-months gasoline prices have risen in Florida and Jacksonville but have declined nationwide. Gasoline prices, in all locations, have risen steadily over the past month.

Figure 5. Average Gasoline Prices for U.S./Florida/Jacksonville, Daily Average, October 2022 – April 2023

Figure 6. Average Gasoline Prices for U.S./Florida/Jacksonville, Daily Average, April 2023

4. SJC Building Permits

Single Family Housing Building Permits

Table 6 shows data on single family housing permits in SJC from March 2022 to March 2023. In March 2023, 392 single family housing permits were granted, compared to 585 in the same month of the prior year. Figure 7 illustrates the longer-term trend by showing the 6-month moving average going back to 2018.
