JULINGTON CREEK PLANTATION
MODIFICATION TO THE PUD/DRI
WRITTEN NARRATIVE

The changes proposed in this Major Modification/amendment would internally reconfigure the current land uses, but would not increase the amount of current approved development or increase the regional impacts of the DRI.

These proposed changes to the DRI/PUD master plan would include the redistribution of dwelling units within their parcels in the Julington Creek Plantation DRI/PUD and a rezoning of Parcel 76 from multi-family (MF-15) to single family residential. The allowable density from Parcel 76, which was 287 multi-family units will be, distributed over three parcels, Parcels 76, Parcel 77, Parcel 80, and Parcel 82. However, the overall allowable density will be reduced by 108 units.

First, the proposed amendment to Parcel 76 would change the current zoning designation from multi-family to single family RS-5 which will reduce the density from 287 multi-family units to a maximum of 96 single family units reducing the allowable density on Parcel 76 by 191 units.

Second, the proposed amendment would shift a portion of the excess density from Parcel 76 to Parcel 80/77. Currently Parcel 80 has a maximum density of 57 single family lots this amendment proposes to add 19 more single family lots to this Parcel and the maximum density will be 76 single family lots on 31.07 upland acres making the overall density 2.4 units per acre. Parcel 77 has been asorbed in Parcel 80 which has 8.67 acres of upland land, but has not been incorporated into the density calculation since the original DRI did not allow for any density on this site previously. The plat for Parcel 80 and the NOPC and Major Modification will combine the two parcels, Parcel 80 and Parcel 77 into one parcel.

Third, the proposed amendment would also shift a portion of the excess density from Parcel 76 to Parcel 82. Currently Parcel 82 has a maximum of 182 single family lots, this amendment proposes to add 64 additional single family lots to this Parcel, allowing a maximum of 246 single family lots. Parcel 82's current zoning designation is RS-2, which is a minimum lot size of 90-foot lots/10,000 sq ft per lot as shown on the MDP. This amendment will have a maximum mixture of (122) 90-foot wide lots and (124) 100-foot wide lots. The 50 foot wide natural vegetated buffer will remain along the southerly right of way of Bishop Estates

Road adjacent to Parcel 82. The DRI maps have been revised to shift the phasing lines between Parcels 81 and 82 to the west.

Fourth, the proposed amendment will correct the total amount upland and wetland acreage within these parcels based on actual boundary surveys and wetland surveys, rather than by aerial interpretations as previously noted on the DRI Master Development Plan Maps, under note #7. The actual upland and wetland acreages are as follows: Parcel 76 overall boundary is 30.33 acres, upland acreage is 27.16 acres and wetland acreage is 3.16 acres, Parcel 80 overall boundary is 69.73 acres, which includes Parcel 77 land, upland acreage 31.17 acres and wetland acreage is 38.56 acres and Parcel 82 overall boundary is 252.98 acres, upland acreage is 161.79 acres and wetland acreage is 91.19 acres.

The proposed amendment will reduce Parcel 76 by 191 units, reallocate 19 additional units to Parcel 80/77 and reallocate additional 64 lots to Parcel 82, but still reduces the overall allowable density by 108 units.

Proposed changes to each parcel are depicted on the Master Development Plan (Exhibit A) and in the attached chart (Exhibit E). The revised Master Development Plan depicts these changes by bolded and italicized type. The chart depicts on one set of columns each parcel as it is currently approved, and another set of columns depicts the proposed changes. Areas left blank indicate that no change is proposed.
